

SUID-AFRIKAANSE NASIONALE SAADORGANISASIE

SOUTH AFRICAN NATIONAL SEED ORGANIZATION

NPC Reg No 1989/003392/08

To all Seed Testing Laboratories and members involved in Certification

Ref: 12/C
4 July 2014

CIRCULAR

INDICATION OF SAMPLER ON SEED ANALYSIS REPORTS

When application is made for the issuing of a Certificate of Certification, one of the requirements is that the application (Preliminary Certificate) must be accompanied by a Report of Test, Examination or Analysis of Seed for the seed lot concerned, which has been issued by a **registered** Seed Testing Laboratory. This requirement is to enable SANSOR to determine if the seed lot concerned complies with the physical requirements for certification, as prescribed by the South African Seed Certification Scheme. A further requirement is that the sample, on which the analysis was conducted, **must** have been taken by the Authority (this includes SANSOR-Authorised Samplers). In order to enable SANSOR to determine if the seed sample concerned was indeed taken by an authorised sampler, the sampler's name and Authorisation number **must** be indicated on the Report of Analysis concerned.

Please note that as from **1 August 2014**, no Report of Test, Examination or Analysis of Seed will be accepted for certification purposes if the sampler's particulars are not indicate thereon.

Regards,

A handwritten signature in black ink, appearing to read 'Eddie Goldschagg', written over a faint circular stamp or watermark.
