

# The South African Seed Certification Scheme

## ANNEXURE 13

### REQUIREMENTS RELATING TO RESCUE GRASS (*Bromus catharticus* Vahl.)

#### 1 Field requirements

- 1.1 Subject to the provisions of paragraph 1.2, a field may be registered as a unit only if -
  - 1.1.1 no plants of any species of *Bromus* have been established thereon for seed production or otherwise during the two growing seasons preceding the registration thereof; or
  - 1.1.2 the plants which are already established thereon have also during the preceding growing season been used for the production of certified pre-basic seed or basic seed or certified seed of the same variety, as the case may be.
- 1.2 A field which is intended for the production of -
  - 1.2.1 pre-basic seed, be registered as a unit for two consecutive growing seasons if breeder seed of the same variety is annually established thereon;
  - 1.2.2 basic seed, be registered as a unit for two consecutive growing seasons if pre-basic seed of the same variety is annually established thereon: Provided that such field may also be registered as a unit if pre-basic seed of the same variety has been produced thereon during the preceding growing season;
  - 1.2.3 certified seed, be registered as a unit for no more than two consecutive growing seasons if basic seed of the same variety is annually established thereon: Provided that such field may also be registered as a unit if basic seed of the same variety has been produced thereon during the preceding growing season.
  - 1.2.4 2<sup>nd</sup> generation certified seed, be registered as a unit for no more than one growing season if 1<sup>st</sup> generation certified seed of the same variety is established thereon: Provided that such field may also be registered as a unit if 1<sup>st</sup> generation certified seed of the same variety has been produced thereon during the preceding growing season.

#### 2 Planting requirements

- 2.1 Seed may be sown or be established in rows on a unit.
- 2.2 All vegetation within a distance of three metres around a unit shall be kept short until seed has been harvested from the plants on the unit concerned.

#### 3 Isolation requirements

- 3.1 A unit shall be surrounded by an isolation area which -
  - 3.1.1 in the case of the intended production of certified pre-basic seed or basic seed -
    - 3.1.1.1 is at least 200 metres wide where the area of the unit concerned is two hectares or less; and
    - 3.1.1.2 is at least 100 metres wide where the area of the unit concerned is more than two hectares; and
  - 3.1.2 in the case of the intended production of certified seed -
    - 3.1.2.1 is at least 100 metres wide where the area of the unit concerned is two hectares or less; and
    - 3.1.2.2 is at least 50 metres wide where the area of the unit concerned is more than two hectares.
- 3.2 Such isolation area shall be free from plants of any *Bromus* which flower at the same time as the plants on the unit concerned, unless -
  - 3.2.1 in the case of the intended production of basic seed, they have been established from certified pre-basic seed of the same variety; and
  - 3.2.2 in the case of the intended production of certified seed, they have been established from certified pre-basic seed or basic seed of the same variety.
- 3.2.3 in the case of the intended production of an open-pollinated variety of 2<sup>nd</sup> generation certified seed, they have been established from 1<sup>st</sup> generation certified seed of the same variety.

#### 4 Requirements for plants

- 4.1 Plants established on a unit may be grazed, provided that the livestock must be timely withdrawn at a stage that will optimize seed production as determined by the breeder of the particular variety
- 4.2 The number of deviating plants on a unit shall -
  - 4.2.1 in the case of the intended production of certified pre-basic seed or basic seed, not exceed one plant per 30 square metres; and
  - 4.2.2 in the case of the intended production of certified seed, not exceed one plant per 10 square metres.

#### 5 Inspection requirements

- Plants which are established on a unit shall be inspected -
- 5.1 before the flowering stage thereof;
  - 5.2 during the flowering stage thereof; and
  - 5.3 during the full seed stage thereof.

**6 Physical requirements**

Seed shall -

- 6.1 have a germination percentage of at least 55% or a viability percentage of at least 75%;
- 6.2 have at least 95,0 percent pure seed;
- 6.3 not contain more than -
  - 6.3.1 0,5 percent other seed; and
  - 6.3.2 5,0 percent other material.
- 6.3.3 Notwithstanding the provisions of paragraph 6.3.1, not more than one seed of any of the restricted weed seed species may occur in an ISTA working sample for the determination of other seed by number of the species being tested.
